Relationships between environmental variabels and species richness

D. Li D. Waller

Working paper – February 7, 2015

Running headline: Environment and species richness

Abstract: Your awesome abstract here.

1 Introduction

Here is your introduction. It should describe clearly the rationale for the study being done and the previous work related with the study. It should also tell readers about your specific hypothese/questions being addressed. Citations will be like this (Adair et al. 2010), or (e.g., Clark and Tilman 2008), or (Eriksson and Ehrlén 1993, Williamson et al. 1999)

2 Methods

Here is the method section. You can include equations easily. For inline equations, use $\text{var}(X) = p(1-p)$. For display equation, use

$$\text{var}(X) = p(1-p) \tag{1}$$

2.1 Results

Insert tables:

Plot	sprich
3294	31
3297	28
3299	26
3330	27

Or put results inline, e.g. the mean species richness is 28.

How about figures? We illustrate this in Fig. 1.

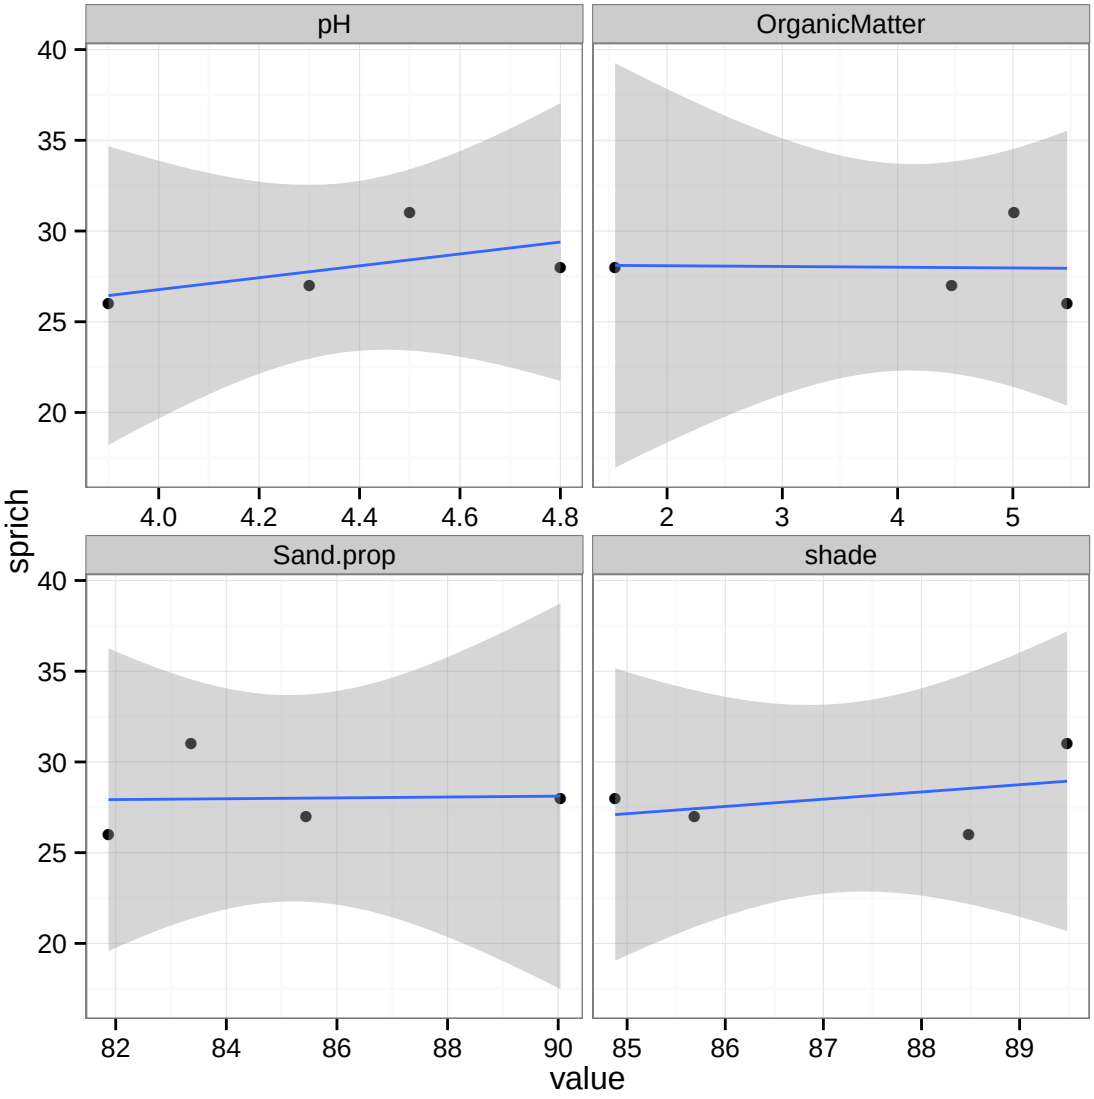

Figure 1: Caption here.
